## GENERAL INSTALLATION & OPERATION INSTRUCTIONS

1. Select a good visible spot in your community or park where you want to install your **DOGIPOT** Pet Station.
2. Prior to installation, remove the small portion of the mounting post from the larger portion before cementing. **Insert the larger portion of the mounting post approximately 14" into an 18" deep by 8" diameter hole filled with a 40 lb. bag of "ready to use" concrete mix.** To stabilize post while cementing, place a rod or bolt through the two bottom holes prior cementing. Level the post in a straight vertical position and let concrete dry for at least 12 hours.
3. After the concrete is dry, insert the smaller portion of the post into the larger cemented portion until the first 4 holes are lined up between the two posts. Use carriage bolts, washers and locknuts to fix the telescopic post in position. the upper bolt in the top overlapping hole, pointing from right to left and the lower bolt in the bottom overlapping hole, pointing from front to back. The total height above ground should now be approximately 6'6".
4. Next, install the **DOGIPOT** pet sign on top of post, with the upper hole matching the most upper hole in the post using enclosed bolts, washers and locknuts. Continue installing the **DOGIPOT** bag dispenser according to the mounting instruction enclosed with the Dispenser, ensuring that the upper edge of the Dispenser is approximately **1" below** the lower edge of the **DOGIPOT** Pet Sign.
5. Install the **DOGIPOT** trash receptacle through the pre-drilled top oval holes in the back wall of the receptacle and through the square post with the remaining bolts, washers and locknuts. **The upper edge of the trash receptacle must be approximately 12½" below the lower end of the DOGIPOT bag dispenser so that the lid can completely open.** The upper back wall of the trash receptacle is supposed to touch the head of the lower post carriage bolt, which creates some space between the post and the receptacle, allowing the receptacle lid to open from left to right, without touching the post.
6. Insert the enclosed **DOGIPOT** trash bags into the receptacle, folding it over the interior retainer bands. **DOGIPOT** offers Product Maintenance Paint to help cover any paint chips which may occur in the powder coating during the life of the product.
