DOGIPARK would like to introduce its new dog shaped, three hoop jump for dogs. The dog shaped hoop jump has three different heights so that dogs of all sizes and ages can find a height suitable for them to be successful.

DOGIPARK®

Matching durable construction with superior design, DOGIPARK'S mission is to create the best outdoor dog park equipment for pets of all shapes, sizes and agility levels.

The surface of this apparatus boasts a thermoplastic layer that resists peeling, cracking and fading under normal outdoor weather conditions. This thermoplastic technology allows for the longevity of the equipment which provides your pet's outdoor **DOGIPARK** dog park with years of use and enjoyment!

SAFETY AND MAINTENANCE SHEET

**SAFETY WARNINGS AND EQUIPMENT MAINTENANCE RECOMMENDATIONS
PLEASE READ THESE IMPORTANT SAFETY WARNINGS AND KEEP ON FILE FOR
FUTURE REFERENCE REGARDING INSPECTION REMINDERS AND LIST OF PARTS.**

- Follow installation instructions and find a safe, suitable location for equipment use.
- All products should be in-ground or surface mounted and securely fastened to concrete. Concrete footers should never protrude above the ground where they are exposed and could create a safety hazard. Ground covering, such as mulch, is recommended over the buried footers.
- Regular scheduled review of equipment should be conducted to ensure there is no existing damage caused by wear and tear, improper use or vandalism.
- All equipment should be free from rust or other structural damage. Replace or repair in the event any rust exists that could affect the structural integrity of the equipment.
- Any areas where the coating has been removed should be repainted to deter rusting or other damage.
- Any protruding bolts, rough or sharp edges should be covered, capped or removed. Inspect for broken, bent or worn pieces and replace if present.
- Never add components not intended for this equipment. **Equipment is not intended for use by people. The equipment is solely intended and designed for dog use only.**
- Proper and regular maintenance of equipment includes, but is not limited to, inspection of footings, all bolts and connection points, edges, landing areas, coatings and surfaces. This includes regular tightening of bolts, nuts and screws.
- **Any worn or broken parts, bolts, nuts, screws, instability in the footers and the like should be replaced immediately to prevent any injury.**
