WE'VE GOT YOU COVERED!

Design and Manufacturing of Commercial and Residential
Shade Structures Across the USA

SHADES BUILT TO LAST

There is a perception in our industry that shade is a commodity, but nothing could be further from the truth. The old adage "you get what you pay for" certainly holds true in the shade industry. Modern Shade will never sacrifice quality just to make a sale.

At Modern Shade LLC, we are passionate about manufacturing fabric tension structures and, as a result, we design each structure with the strength and modern appeal that customers are demanding.

OUR WORK

We've worked with various companies on commercial projects for company buildings, personal areas such as backyards and car ports, and we've even worked on public projects for zoos and water parks.

WHAT WE OFFER

DESIGN

ENGINEERING

FABRICATION

HOT DIPPED GALVANIZING

POWDER COATING

OUR STRUCTURE SPECS

QUALITY

Our fabric membranes are made with the highest quality architectural shade fabric and Teflon thread. Our goal is to provide heavily reinforced, high-quality materials.

UV RESISTANT

All of our fabric and thread materials are UV resistant. Our HDPE architectural fabric provides an open feel that cools the air underneath it by as much as 25 degrees and blocks up to 97% of harmful UV rays.

WIND RESISTANT

Our framing systems are manufactured with high strength steel for maximum reinforcement. Our commercial structures are designed and engineered for 90mph winds with fabric installed and 150mph winds with fabric removed. In addition, our structures are rated for 5 psf snow loads.
